PROJECT MANAGEMENT REVIEW

PROJECT GOAL

Project IN2IT aims to develop and implement an innovative technological infrastructure for the purpose of advancing internationalization in higher education, and thereby to expand the practical applications of internationalization **in Israeli academic colleges,** to strengthen the capacities for teaching, learning, research, and training, and to improve the quality and positioning of Israeli state-funded academic colleges in higher education.

Internationalization will be accomplished by focusing on three core international academic activities:

(a) **teaching and learning academic curriculum;**

(b) **knowledge sharing by research communities;**

(c) **academy-industry cooperation.**

All three core academic activities will be internationalized **with the support of contemporary innovative technologies.**
